Index

Abstract types of form, 48
Accidental discovery and drawing, 131–32
Accretion and deletion, 26
Active and passive perception, 13–15, 124
Added graphics, 223–33
African drawings (Tallensi), 270
Ambiguity: of bas-reliefs, 73, 75; of contrasts, 26; in figure-ground, 260; of motion devices, 282; and occlusion, 97; in tactile pictures, 70; and top-down input, 50; and types of form, 48
Amodal properties, 16, 18, 278
Announcing: and construction tasks, 123; in early drawing development, 134–35
Ansis, S., 30
Aristotle and metaphor, 218–20
Assembly task, 123
Australian aboriginal art, 97
Axes: of junctions, 39–43; of lines, 21–22; midway between contours, 48; off-center, 271; and physiological channels, 50–55; and shape-from-shadow, 35–38; and tactile lines, 90–91
Baldinucci, Filippo, 216
Bas-reliefs, 73–77
Bewick, Thomas, 249
Berty, blind volunteer, 61–62, 96
Bilevel pictures, 46
Blindness status, comparisons: by Heller, 67–69; by Klatzky et al., 16; by Lederman et al., 70–71
Boost defined, 62
Brunelleschi, Filippo, 141
Categorization and metaphor, 219–20
Cave art, 32, 269–70
Cel, youngest Haitian volunteer, 155–57
Chiaroscuro: defined, 25. See also shape-from-shadow
Child, Jack, 227
Clifford, W. K., 10
Coding space, 209–15
Collinear contours, 41
Color change, 44
Comic books, 247–48
Communication principles, 3, 19, 153, 250–51
Composite pictures, 62
Compromise pictures, 103
Computer vision and outline, 24
Connections used in drawings by children, 138–40, 156, 158, 171, 174
Context and identification tasks:
categories, 67, 83; list, 68; picture, 67; story, 62–66, 84–85
Contour: defined, 23
Contrast: defined, 25
Da Vinci, Leonardo, 25
Deafness and octaves, 272–79
Deletion and accretion, 26
Di, youngest Phoenix volunteer, 159–60
Diagrams, 153, 233–42
Dictated drawings, 135–36
Diderot, Denis: observations on the blind, 292–93
Dimensions: Lederman et al.'s classification, 71; of variation, 106–7
Disintegration: defined by Caron-Pargue, 103
Direction from a vantage point, 104, 117, 143–52, 156, 191
Dissection category of drawings, 145–47
Distal senses, 1–9
Drawing study on the sighted and a cube, 144–52
Drawing traces, 134
Duchamp, Marcel, 286

Early grouping stage, 37
Early blind defined, 63
Emblems, 220–21
Encoding specificity, 17–18, 212–13
Extension, 105, 136–37
Expression theories, 284
Errors in identification as near-misses, 59–60
Errors as intended in metaphors, 153–54, 222
Ethiopian subjects, 75, 267
Euclid, 10

Familiarity, 26, 42, 70, 124–25
Feedback, 38, 49
Fiat, 135, 153, 169
Foldout drawings: cubes and cylinders, 139; cubic objects, 186–91; disadvantages, 140; by Hal, Phoenix, 163; by Katz's subjects, 121–22; by Ros, Hait, 158; table, 109–12
Foreground-background change, 255
Form, abstract types, 48
Fourier analysis, 46
Fractals, 27

Grice's maxim, 221

Haiti: older child, 157–59; pointing study, 193–95; recognition study, 87–89; summary of drawing study, 166–67; youngest child, 87–89
Haptics: and chain of perception, 8–15; definition, 8; and dynamics, 290–91; exploratory procedures, 14–15; and pointing, 192–98; and sensation-centered representation, 72–73; skill assessed, 14; and vibration, 13, 272–79
Harvard students, 57–60
Haut-reliefs, 73–77

Impressions, local: 30, 130–31, 144, 253–61; and figure-ground, 259
Imprints, 57–61, 73–74, 103, 191
Infants, 55
Intention: and early representation, 130–32; made explicit, 240–42; and tropes, 217–22; and early representation, 130–32
Interlaminar-Thin Stripes (ITs) channel, 52
Interpolation, 53

Kathy N., 261
Kathy R., 175–78
Lu, youngest Tucson child, 163–64
Magnocellular-Thickstripe-Medial Temporal channel, 52
Manipulatory space, 196
Maplike coding, 209–15
Marking and non-marking pens, 134
Metaphor: and categorization, 219; events, 19; and humor, 232; and meaning change, 217–18; and nuance, 219–20; and pain, noise, and smell, 233–40; and pain, numbness, and motion, 279–82; in pictures, 6, 19, 152–54, 172–73; and spokes, 243–50; and style, 280; types, 217–18, 250
Motion and drawing studies: person, 222–27; wheel, 228–33; 243–49
Motion line: first example from a blind person, 115
Motion and shape-from-shadow, 29–30
Motor consequences of tracing, 134

Negatives and positives, 28–32
Nepal, 32
Norwegian subjects, 73–78
Object-centered, 199
Observer-centered, 199
Octaves, 272–79
Optic array: defined, 25
Orientation, 78–80, 141, 172, 191–92
Outline: and axis as contour, 39–40; and axis as median, 48; and axis off-center, 271–72; chiaroscuro figures, 28–30; computer vision, 24; constancy, 36; and contours, 25; and contrasts, 28; and convenience of, 1–2; and emotion, 262; and evolution, 269–72; processing and axes, 35–38; and scission, 39–42; 50–53; and silhouettes, 271–72; style violations, 102–3, 117, 137–38, 155–56, 158, 160, 168; and subjective contours, 33–34, 294–95. See also Junctions; Perspective; Metaphor

Parietal area, 49
Parvocellular-Interblob-Pale stripes (Pip) channel, 52
Passive and active, 13–15
Pathways in vision, 34–35, 50–54
Pattern perception, 18–19, 27, 181
Perception: as ambulatory, 11–12; amodal, 16; chain of events, 8; using a medium, 11–13; and space, 16; and time, 9
Perspective: and Cal's glass, 7, 255; convergence, 5, 181–85; and cubic objects study, 186–92; and Diderot's observations, 292; drawing development theory, 140–44; drawing development study, 144–52; foreshortening, 122, 174; Hal's table, 161–72; judgment
Perspective (continued)
  tasks, 198–205; Kathy R’s cubes, 176–77; and oblique, 111–12; and parallels, 27, 117; and Pat’s railroad, 296; in Piaget’s three-objects task, 205–8; pointing tasks, 192–98; and Ray’s glass, 100–101; and Ray’s table, 109; subtense change, 181, 192–98; teaching and drawing, 122; in touch for a cube, 185; and Tracy’s cubes, 127–28, 173–75; in vision fragile, 184; in vision informal, 27; in vision robust, 183
Petroglyphs, 22, 32, 67
Picture identification by touch: children from Arizona, 80–86; children from Haiti, 87–89; and figure-ground reversal, 253–26; Heller on effect of a list of referents, and advantages of the late blind, 67–70; illustrations in stories, 62–67; imprints vs. projections, 57–62; Katz on the blind identifying pictures by the blind, 71–72; Lederman et al. and Loomis et al. on two-dimensional and three-dimensional referents, 70–71; motion devices, 243–50, 279–83; orientation of the picture surface, 78–80; Ostad on training, 73–78; perceptual states, 279–82; Pring on general hints, 71; scene, 67–68; surface properties, 284–285; twig figs, 261–67
Pinhole camera, 142
Pointing tasks, 192–98, 209, 214
Polarity, 34–37
Positives and negatives, 28–32
Postural devices, 165–66, 223–40
Processing order, 34–38, 49
Profile, 61, 118–20, 129
Projections, 57–61, 71, 191–92. See also Perspective
  Prototypes, 119, 129–30
  Proverbs, 221
  Proximal senses, 1, 3–5, 8
  Psychophysics, 18
  Puerto Rican students of Wally, 122–23
  Raf, older Tucson child, 164–66
  Ridges, 45
  Ros, older Haitian child, 157–59
  Runes, 225
  Sally, studied by L. Pring, 71, 120
  Scale, 17, 70, 73–76, 215
  Schematic patterns, 42–45, 49. See also Stereotypes in drawing
  Schuler, R., 274, 277
  Scission, 34, 39–41, 49–55 passim
  Separate-and-distinct analysis, 35
  Shadow lettering, 52
  Shape-from-shadow analysis 28–38, 42, 294–95
  Silhouettes, 271
  Skills in exploratory touch: examples, 12–14, 185; theory, 15–16, 185–85, 209–15; studies 4, 14, 15, 209, 214–15
  Songe of Papua New Guinea, 23, 32
  Spatial awareness: coding 209–15; and sensory channels, 16. See also Perspective
  Spatial frequency, 46–48
  Specificity, 24, 42–45, 55, 132, 259–60, 266–67
  Star table, 108–9, 200–205
  Stereotypes in drawing, 119, 122, 126, 129–32
  Stick figures, 96–97, 101, 115, 120–21, 162, 261–67, 270
  Stories with illustrations: “Guitar” and “Tricycle”, 91–94; and study on recognition, 62–66
  Street figures, 30–31
  Style, 286–89. See also Outline
  Subjective contours, 33–34, 49, 294–95
  Surface: as basis of perception, 9; geometry, 2, 3, 9–11, 37; of the picture and its orientation, 78–80, 141, 191–92
  Swedish subjects studied by Katz, 71–72, 120–22
  Tacit knowledge, 114
  Tallensi, 270
  Topology, 27, 140, 156
  Terminations, 23, 33–34
  Texture defined, 25
  Thermoforms, 73
  Thickness-of-line device, 7, 100, 189–90
  Three-object (perspective-taking) Piagetian task, 205–8
  Top-down processing, 48. See also Feedback
  Touch as dynamic, 291. See also Haptics
