FOREWORD

We are ready with issue 32 of AJFAND. Through this FOREWORD we wish to invite articles that particularly address Maternal and Young Child Nutrition. These will constitute a special issue in collaboration with GAIN which stands for Global Alliance for Improved Nutrition.

Also through this FOREWORD we wish to announce the Fourth African Nutrition Epidemiological Conference which will take place in Nairobi, Kenya, from October 4 to 8 this year (2010). I am Co-Chair of the Local Organizing Committee. The host institution is KEMRI (Kenya Medical Research Institute). Please visit the website www.anec4.or.ke to witness the rich programme we expect to put on. We anticipate an exciting conference and wish to urge you all to consider joining us. We are also interested in those who can sponsor young scientists and those who are willing to make a monetary contribution towards the running of the conference. Might you wish to be an exhibitor? Please contact us and also consider taking a holiday in Kenya after or before attending the conference. Kenyans are very hospitable to guests. We welcome as much Kenyan support and participation as possible. Please mark the dates. We wish you great reading of this issue. The articles, once again, are diverse and interesting.

In this issue, we have the following articles:

Editorial: Ruth Oniang'o

It takes more than Good Nutrition to save young lives

- Processed products of termites and lake flies: Improving entomophagy for food security within the Lake Victoria region.
  Ayieko Monica et al.

- Effect of processing methods on nutrient retention and contribution of cassava (Manihot spp) to nutrient intake of
Nigerian consumers.
Adepoju Oladejo et al.

- Screening of leaf meals as feed supplements in the culture of Oreochromis Niloticus.
Chidozie Jude et al.

- Chemical composition in relation to the quality of wines produced from Nigerian Syzygium Malaccensis and Eugenia Owariensis apples.
Enidiok Sunday and LE Attah

- Fruit yield and quality of drip-irrigated tomato under deficit irrigation.
Birhanu Kebebew and Ketema Tilahun

- Determination of bisphenol a diglycidyl ether content in foods from lacquered cans.
Biego Henry et al.

- Genetic variability and correlation in single cross hybrids of quality protein maize (Zea Mays L.).
Yusuf Mansir

- Cassava processors' awareness of occupational and environmental hazards associated with cassava processing in south-western Nigeria.
Oyegbami A et al.
