Re: Permission to Use Copyrighted Material in a Doctoral Thesis

Dr. Arne Wittstock
Lawrence Livermore National Laboratory
Livermore, USA.

I am a University of Toronto graduate student completing my Doctoral thesis entitled “Formation characteristics and electrocatalytic properties of nanoporous metals formed by dealloying of ternary-noble alloys”. My research supervisor is Dr. Roger C. Newman.

I would like to request your permission to include the following material in my thesis: Figure 3, in page 18 in your Doctoral thesis (see image below). The material will be attributed through a full citation.

My thesis will be available in full text on the internet for reference, study and or copy. Except in situations where a thesis is under embargo or restriction, the electronic version will be accessible through the university Libraries web pages, the Library’s web catalogue, and also though web search engines. I will also be granting Library and Archives Canada and ProQuest/UMI a non-exclusive license to reproduce, loan, distribute, or sell single copies of my thesis by any means and in any form or format. These rights will in no way restrict re-publication of the material in any form by you or by others authorized by you.

I appreciate if you can confirm by email that these arrangements meet with your approval.

Sincerely,

Adrián A. Vega, M.A.Sc.
Ph.D. Candidate

Figure 3 – Page 18 of the Doctoral thesis entitled “Nanoporous gold: novel catalytic and sensor applications”.
Dear Adrian,

it is a pleasure! Please go ahead and re-use the figure.

Best
Arne
