Dear Dr. Pikor,

The American Association of Immunologists, Inc., grants permission to reprint Figs. 1-7, Tables I and II and Supplemental Figures from the article “Substrain differences reveal novel disease-modifying gene candidates that alter the clinical course of a rodent model of multiple sclerosis,” published in The Journal of Immunology, vol. 184, pp. 3174-3185, 2010, in your thesis, contingent on the following conditions:

1. That you give proper credit to the authors and to The Journal of Immunology, including in your citation the volume, date, and page numbers.

2. That you include the statement:

   Copyright 2010. The American Association of Immunologists, Inc.

3. That permission is granted for one-time use only for print and electronic format. Permission must be requested separately for future editions, revisions, derivative works, and promotional pieces. Reproduction of any content, other than Figures and Figure Legends, from The Journal of Immunology is permitted in English only.

Thank you for your interest in The Journal of Immunology.

Sincerely,

Gene Bailey
