This bibliography collects work focused specifically on law and narrative, published (approximately) over the last four years (i.e., 2013-17). A significant amount of work touches on narrative, without taking that as its focus; this work will be included in a bibliography of recent work on law and literature more generally (now being compiled).

I have tried to link to non-paywalled versions, but in many cases that was not possible.

Entries listed under the collections and special journal issues in section I are not listed individually in section II.
